EDUCATION

COLUMBIA BUSINESS SCHOOL — New York, NY
MBA, Technology Strategy & Entrepreneurship, May 2028 — 2026 – 2028

COLUMBIA ENGINEERING — New York, NY
MS, Artificial Intelligence & Machine Learning, May 2028 — 2026 – 2028

GEORGIA INSTITUTE OF TECHNOLOGY — Atlanta, GA
BS, Computer Science, May 2018 — 2014 – 2018
Honors & Leadership: Highest Honors | Alpha Kappa Psi Business Fraternity

EXPERIENCE

RETOOL — San Francisco, CA / New York, NY
YC 2017, $65M Series C, enterprise platform for building internal tools and AI apps — Jun 2022 – Mar 2026
Senior Product Engineer / Acting Product Manager

- Led product engineering for Retool's core IDE redesign, analyzing user behavior, support tickets, competitors, and customer feedback to identify workflow friction; partnered with Product, Design, and Customer Success to launch the experience to 40K+ MAU in 3 months, increasing adoption of targeted tools by ~10%
- Defined and prioritized the MVP roadmap for Retool's record-and-replay testing platform; led 0→1 development across a 10-person cross-functional team, designing the prototype and UX, defining technical architecture, and driving early adoption across ~15 enterprise accounts representing $10M+ in ARR
- Prioritized a customer-requested Forms feature based on $5M+ in ARR at risk; translated customer needs into product requirements and owned engineering end-to-end to automatically generate form inputs from database column types, eliminating manual configuration for a core enterprise workflow and increasing Forms WAU from ~5K to ~8K
- Identified a drop-off in the IDE's query-creation funnel via usage and customer-segment analysis, prompting a new onboarding flow and improved feature discoverability; measured launch adoption using Databricks, Amplitude, FullStory and Datadog

AMPLITUDE — San Francisco, CA
YC 2013, product analytics platform for understanding user behavior, Series C to IPO — Aug 2018 – Apr 2022
Product/Software Engineer | *Tech Lead; promoted twice*

- Led engineering for Amplitude's dashboard experience, defining success metrics, rollout and GTM strategy for 4 high-priority features across onboarding, creation, organization, and collaboration; helped grow dashboard MAU 50% from ~20K to ~30K
- Conducted customer research and benchmarked Okta/AWS permission models to inform the product approach for Amplitude's first user-group permissioning system; architected and launched the system to support admins across ~2K customer accounts
- Solely architected and built an AWS Lambda-based chart rendering service to replace an unreliable chart image export system, enabling customers to export and share charts as images/PDFs and through Slack; delivered ~2x faster rendering while improving reliability, powering 300+ daily exports
- Mentored junior engineers and led technical execution through architecture design and task delegation; designed engineering interview questions and conducted 50+ interviews from junior to staff level as the engineering org scaled from ~30 to 100+

ENTREPRENEURIAL

CHEM — New York, NY
CTO Co-founder, *AI matchmaking app* — Oct 2025 – Mar 2026

- Identified demand for in-person dating experiences over app-based matching through 50+ customer interviews and partnered with relationship-science PhDs to inform matching criteria; pivoted from an unscalable human matchmaking model and built an AI-agent prototype that incorporated user feedback to generate personalized 6-person group events for 50+ LGBTQ+ users

PASSIONFRUIT — San Francisco, CA
Co-founder, *team of 3 engineers, platform for musicians to track and share skill progress* — July 2020 – Mar 2021

- Identified demand for sharing unfinished work with peers through 100+ musician interviews; co-led a 3-engineer team to build and launch a progress-sharing platform in 2 months, growing to 200+ WAU and earning an interview with Y Combinator

ADDITIONAL INFORMATION

Technical Skills: Product Management & Design (Jira, Confluence, Linear, Figma) | Programming (JavaScript, Python, Java, SQL, Swift, HTML/CSS, GitHub) | Frontend & Mobile (React, React Native, AWS, Google Cloud) | Data & Analytics (A/B Testing, Databricks, Snowflake, Amplitude, FullStory, Datadog) | AI Development (Claude Code, Cursor, GitHub Copilot, AI Agents)
Volunteer Work: Shanti Project (support people living with HIV) | AIDS/LifeCycle rider (SF to LA, raised $4K for HIV services)
Interests: Music producer (Ableton) | DJ (jazz, house) | Advanced scuba certified | Surfing | Biking | Living abroad
